Brian,

I finally made it back to the office (b) (6). I wasn't in this position in 2001, but I reviewed the documents. It does not appear that we have the testing from 2001.

Jacob:

As you may know, your administratively continued NPDES permit included a requirement to conduct whole effluent toxicity testing (see Pages 7 and 8). The testing was to have been conducted in August of 2001.

<https://www.epa.gov/npdes-permits/npdes-permit-potlatch-corp-st-maries-complex-idaho>

I know you may not have the results of this testing anymore, and that's OK, since you are not required to retain records for this long. However, if you do happen to have the data from this toxicity testing, I would like to see it.

Thank you,

Brian Nickel, E.I.T.
